

To whom it may concern,                      Xm radio is one of the best ways to stay current on the weather and traffic situations while on the road or at home. I am in the military, and I am originally from Weleetka, OK. Any time I need weather information all i have to do is hit a button on xm, otherthan surf the FM or AM channels waiting for the weather. Its constant and up to date with the latest information on weather and traffic.

Sincerely,

John Case
